# VISHWAS PATEL

Python Developer | Machine Learning | Front-End Developer

📞 8866806760   @ vishwaspatel0305@gmail.com   🔗 linkedin.com/in/vishwas-patel-72b551230/   📍 Bengaluru
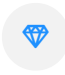

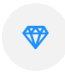

KEY ACHIEVEMENTS

User Engagement Increase
Designed AI Virtual Assistant serving 200+ users daily.

Accurate Facial Recognition
Built face recognition system with 95% accuracy rate.

Project Leadership Success
Led a team of 3 on Python projects boosting efficiency by 20%.

STRENGTHS

Eager learner
Eager to apply knowledge in dynamic teams.

Efficient coding
Strong skills in building efficient code.

SKILLS

Python   SQL   Data Analysis

Machine Learning   Algorithms

Git   Flask   Html   Css

Java script

LANGUAGES

English   Advanced   ●●●○○

HIndi   Intermediate ●●○○○

Gujarati   Intermediate ●●○○○

SUMMARY

I am a **Python developer** and **Machine Learning enthusiast** pursuing a Bachelor of Engineering in Computer Science and Engineering. With expertise in Flask, Django, NumPy, Pandas, and machine learning, I have developed projects like a **Prediction Store** (price prediction for stocks, cars, and houses) and a **Face Recognition System** (leveraging AI for secure and efficient authentication). I am passionate about building innovative, user-centric applications with real-world impact.

PROJECTS

Prediction store
📅 10/2024 - 12/2024   📍 Bangalore
Python project on Ml
- Developed a web-based application for predicting stock, car, and house prices using machine learning models (Linear Regression, Random Forest, LSTM). Integrated AI-powered suggestions and a chatbot for enhanced user interaction. Designed an intuitive interface with real-time data visualizations (graphs and tables) using Flask, HTML, CSS, JavaScript, and Bootstrap. Implemented secure login functionality with a database and ensured scalability and efficiency for accurate, real-time predictions.

AI Virtual Assistant
📅 05/2024 - 06/2024   📍 Bengaluru
Python Project on AI
- Developed a fully functional AI Virtual Assistant using Python, demonstrating strong skills in natural language processing, machine learning, and user interface design. Designed and implemented features to enhance user interaction and streamline tasks, showcasing practical experience in building intelligent, responsive applications

Face Recognition Project
📅 06/2024 - 07/2024   📍 Bengaluru
Python Project on ML
- Developed a face recognition system using Python, incorporating advanced techniques in computer vision and machine learning. Utilized libraries such as OpenCV and dlib for facial detection and recognition, achieving accurate identification and authentication. Demonstrated strong problem-solving skills and proficiency in implementing real-time image processing solutions.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

GPA
7.5 / 10.0

Visvesvaraya Technological University   📅 10/2021 - 07/2025
- Completed Bachelor of Technology (B.Tech) in Computer Science from VTU, specializing in software development, algorithms, and system design.
